1. Introduction

With an increasingly aggressive news media and the explosion of social networks, the global spotlight is focused upon corporate behavior like never before. News of the unethical behavior of executives and staff spread beyond the capacity of PR firms to soften often irreversible damage to the company's brand. Thus, it is imperative companies approach business with ethical behavior as a foundational belief and build systems to educate and compel staff to operate in ways that include ethical analyses of all business decisions. This course provides future managers an understanding of different ethical paradigms, the knowledge about how to build systems to promote ethical behavior, ways to integrate ethics into the corporate decision making process, and an understanding of how to reconcile global business demands and ethical behavior. Students will take away a theoretical understanding of ethical training along with the experience of discussing and debating actual ethical quandaries that lack easy answers.

NOTE: Due to the uncertainty of the COVID-19 situation, this class will be conducted as a LIVE LECTURE using ZOOM. To join this class, an electronic device with strong broadband internet, a webcam, and microphone are required.

2. Course Objectives

- a) Gain an understanding of the basic principles of ethics, including utilitarianism, rights, equality, and fairness
- b) Be able to apply these methods and principles in hypothetical cases
- c) Understand the unique aspects of ethics as they apply to a global business environment
- d) Encourage students to share, communicate, and debate their thoughts and opinions regarding these contentious ethical quandaries
